Objective

Highly motivated web developer, seeking an opportunity to use my skills, knowledge and passion for creating user-friendly web applications

Skills

- Knowledge of HTML5, CSS3, JavaScript, React, Node Js and Express and MongoDB
- Knowledge of creating web applications that are responsive in various devices.
- Solid understanding of restful APIs and integrating them into web applications
- Familiar with version control system such as Git.
- Knowledge of Context API and useReducer for state management.
- Excellent problem-solving skills and ability to debug.

Personal Projects

Meal recipe app

https://s-mealrecipes.netlify.com

https://github.com/Sibusiso75/meal-recipe-app.git

- I have used a third-party API to create a meal recipe website that prepares people to cook meals around the world by just following instructions and using specified ingredients using React in Frontend.
- Created RESTful APIs for registration, login, forgot password, reset password and email verification using Express JS

- Implemented user authentication and authorization using JWT.
- Stored user data using MongoDB

Ecommerce-site

https://github.com/Sibusiso75/ecommerce

https://s-react-e-commerce.netlify.app

- Developed an ecommerce website where users can browse, search, view and add items to their shopping cart
- Implemented cart functionality, allowing users to increase and decrease quantity

Task manager

https://github.com/Sibusiso75/my-task-list.git

https://react-manage-tasks.netlify.app

Portfolio website

https://github.com/Sibusiso75/portfolio.git

https://sibusisomatebese.netlify.app

- I have created my portfolio website to show case my previous projects, skills and a contact form with email notifications to communicate with potential clients.
